MEMORANDUM FOR: Executive Director

FROM: Director of Central Intelligence

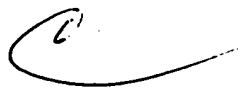

SUBJECT: Suggested Verification Intelligence Initiative

1. I somewhat agree with the DDCI's comment on the cover sheet of your memorandum because I am not clear whether it would facilitate or foul up the budget process. This requires some deliberation and I am open to argument.

2. I want to encourage this kind of thinking shown by [redacted] We need to present to the new Committees a briefing on what we do and what we can do more of on arms control monitoring. We need a primer on what these capabilities are, actual and potential, how they really work, how they contribute to the monitoring process. [redacted] list of possible verification initiatives is one of the most comprehensive I have seen. If he has the time, perhaps he could draft a presentation to the Committees. This could give us a clearer idea of how a verification initiative might be received.
